

# Enfoque Pediátrico del colgajo microvascularizado de peroné en reconstrucción mandibular

Residente: José Alejandro Lujan Rivera

Coautor: Raul Dueñas Gonzalez

Coautor: Hector Orozco

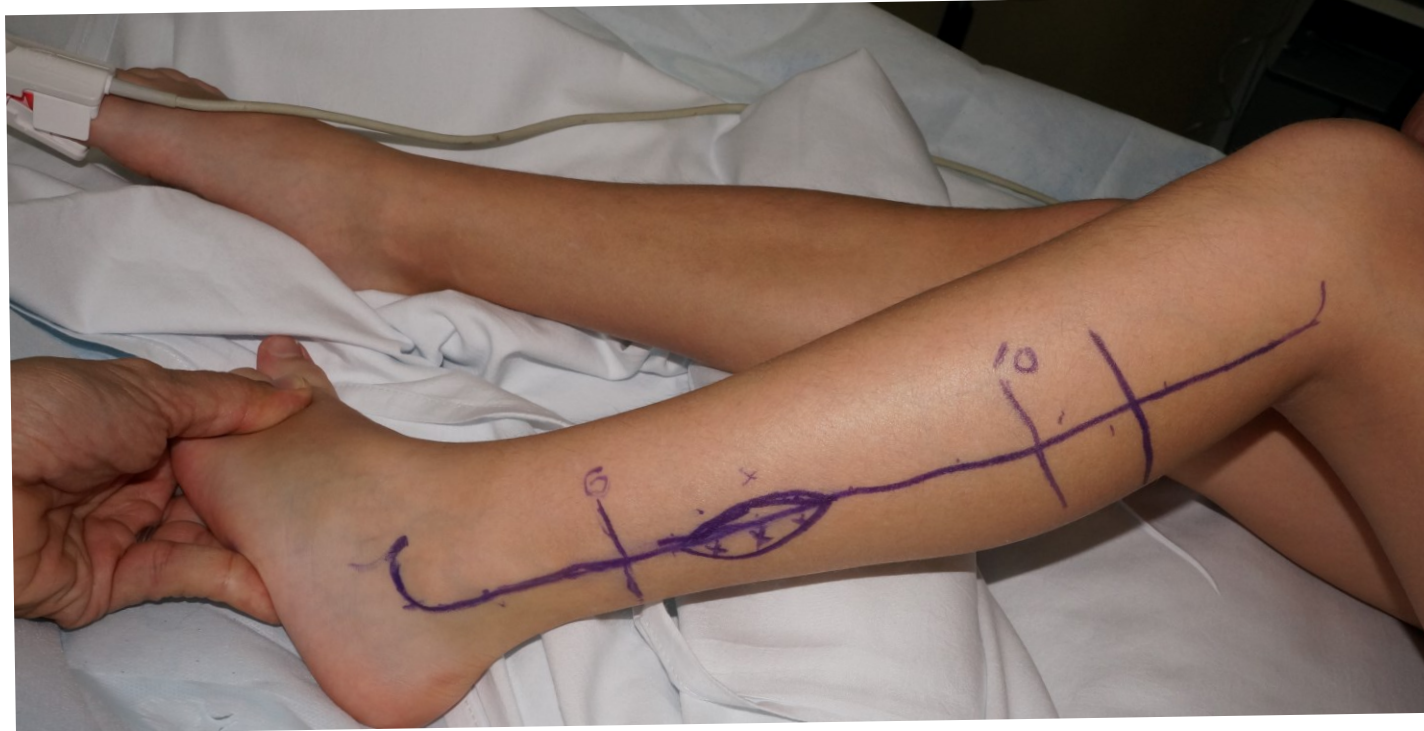

- Nombre: V. P. G.
- Sexo: Femenino
- Edad: 9 años
- Originaria: Zapopan Jalisco.

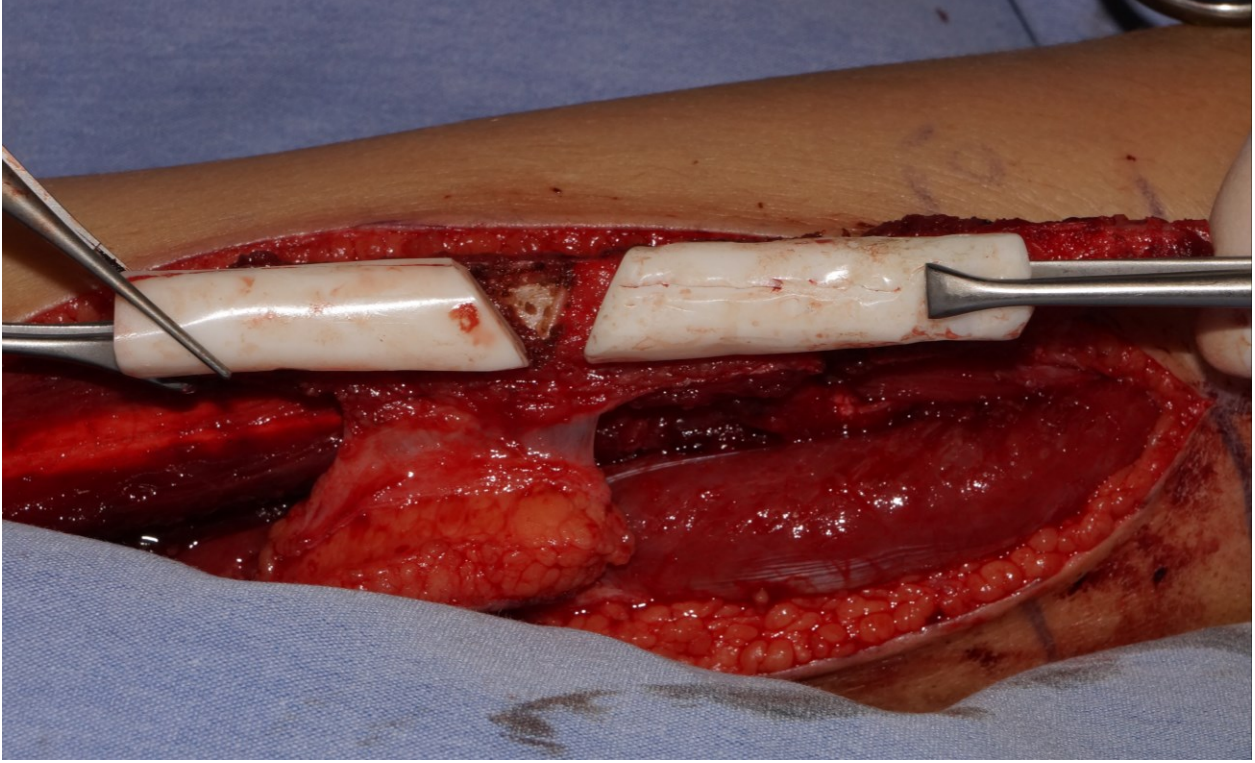

# Conclusión

- El injerto microvascularizado de peroné es una opción viable en pacientes pediátricos.
- Debido a la alta vascularidad periódística del peroné se logra una adecuada conformación de la mandíbula.
  - Mínima morbilidad en sitio donante.
